WEATHER OF CONCERN

Weather of Concern

- Wet and unsettled weather will continue across Northern and Central California moving further south today. Cold and unstable air will settle bringing the threat of showers and thunderstorms. More rain is expected to arrive Friday or Saturday.

Active Weather Warnings, Watches and Advisories by County:

- http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php - Temporarily unavailable. NWS is in the process of repairing the page

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

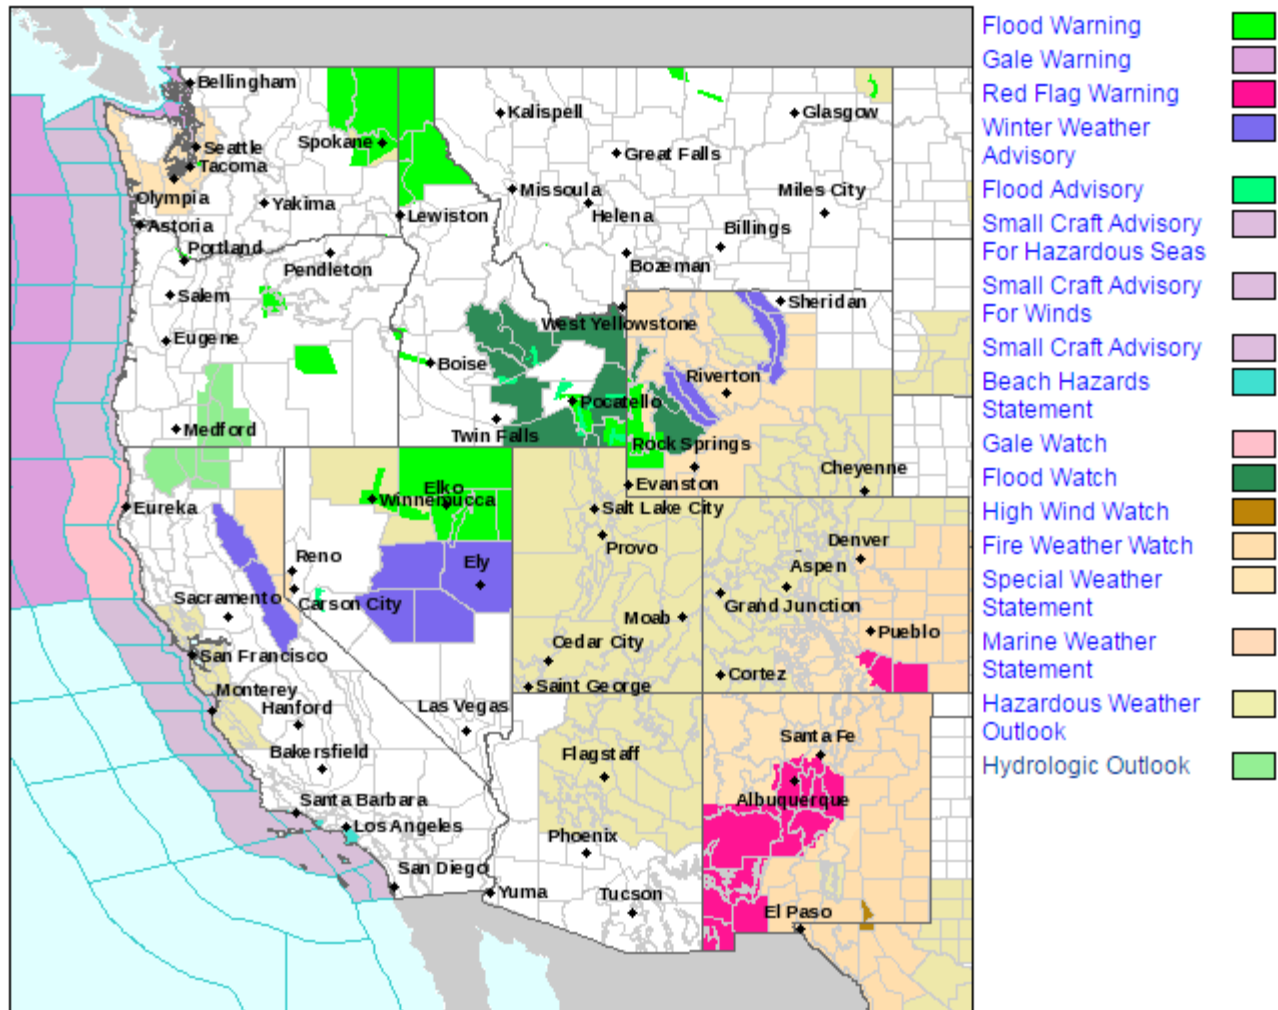

The next weather system of the ongoing unsettled weather pattern will be moving through the Northern California today. Most of the steady precipitation today will be over the SE quarter and far SW areas of the Geographic Area with showery conditions expected elsewhere. Isolated thunderstorms are possible again today with small hail and certainly locally heavy rain. A few showers are expected to continue overnight. Much of the region will be dry Thursday, however, the next system will probably already be moving ashore Thursday afternoon and bring more wet weather and gusty southerly winds to the region Friday. Showers are likely to be lingering over the northern and eastern areas Saturday followed by a brief dry period overnight. Another weather system appears likely to arrive Sunday with more precipitation developing and lasting through Monday afternoon. Locally heavy showers and isolated Thunderstorms could occur with these next systems as well. Next Tuesday may be the start of a relatively dry period for North Ops, although some showers could linger near the Oregon Border for a few days. The lowest snow levels through the weekend will be around 4000 to 5500 ft in the north and 5500 to 7000 in the south.

SOUTHERN CALIFORNIA

A cold pocket of air will linger over Southern California today bringing scattered showers and a few thunderstorms to the region. Yesterday, several hundred lightning strikes occurred north of Fresno County. Today, the storm coverage may be focused on Kern County toward Los Angeles and the Inland Empire with the peak period occurring late this afternoon. Expect brief heavy rain and small hail with the most intense storms. Overall, expect a half inch of additional rainfall with quarter inch further south. The system will pull east of the area tonight, which will result in north winds of 20-30 mph through northern Los Angeles County and the Cajon Pass. Thursday will be mostly sunny and warmer with highs back in the 50s in the mountains to the lower 70s in the valleys. But a quick-moving storm will enter the state Friday, bringing moderate rain to Central California by Friday afternoon. Light rain will be possible over Southern California Friday night into Saturday. Another 1.00 – 1.50” of rain may fall over the Central Coast and Sierras with a quarter inch possible over portions of Southern California. A weak system may bring half as much precipitation Sunday night into Monday. The weather pattern looks to remain cool and unsettled much of next week.
